

From strategy to solution

Most AI initiatives stall. Not because of the technology.

Because of the implementation gap.

For department leaders, the challenge isn't understanding AI — it's applying it to the bottlenecks that drain budget and headcount. Accelerate bridges that gap, replacing speculative discussion with a tangible, working solution built inside your existing Microsoft 365 environment.

THE ACCELERATE FRAMEWORK

Three stages. One working prototype. Zero new tools.

01 Problem Identification

We select a single right-sized bottleneck, scoped for rapid deployment with measurable labour costs.

02 Rapid Prototyping & MVP

A functional automation built inside your M365 environment. Manual effort becomes autonomous digital output.

03 Validation & Roadmap

The MVP becomes a live case study, surfacing what's needed to scale across the department.

WHAT YOU GET

Tangible Task Displacement

From "personal use of AI" to an MVP executing a real process.

Digital Asset Creation

Manual tasks converted into reusable, autonomous digital labour.

Proof of Utility

A visible win that gives finance the justification to scale.

MINDSET: YOU'LL MOVE FROM L2 TO L3

L0 Unaware

No AI literacy.
Fear & uncertainty.

L1 Literacy

Basic awareness.
Occasional use.

L2 Integration

Daily AI habits.
20% time-capital.

L3 Redesign

Workflow shifts.
Insourcing gains.

L4 Transformation

AI-native model.
Agents + people.

No value, no fee. If we don't create measurable business value, you don't pay.

How the sprint works

DURATION

2 × Half Days
~8 hours total

GROUP SIZE

4–8 People
Team or cross-functional

FORMAT

On-site or Remote
Fully facilitated by TIP

AVAILABILITY

Rolling Intake
2–3 weeks lead time

No value, no fee. If we don't create measurable business value, you don't pay. No other AI capability provider backs their delivery with this.

PREREQUISITES

- ✓ **Completed Step 1**
Basic GenAI fluency and awareness of personal productivity use cases.
- ✓ **Microsoft 365 Environment**
Business Standard or above. No additional tools required.
- **A Known Bottleneck**
Recommended. TIP can help identify the right problem in Session 1.
- **No Technical Background Needed**
Built for function leaders, not engineers.

SESSION OUTLINE

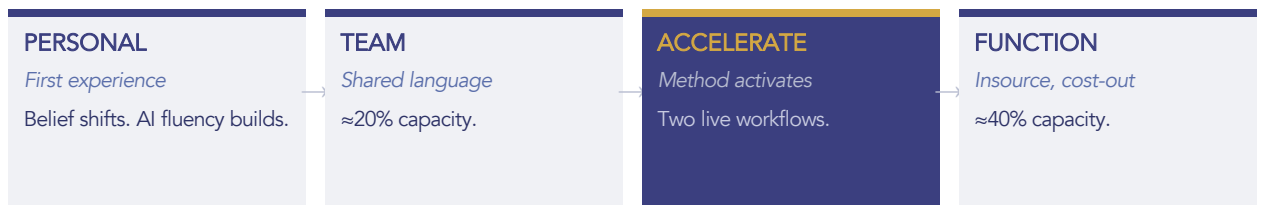

- Session 1** **Problem Identification & Scoping**
Define the bottleneck, agree success metrics, spec the MVP.
- Session 2** **Rapid Prototyping & Build**
Hands-on construction of the automation in your M365 environment.
- Session 3** **Test, Validate & Iterate**
Live testing against real data. Refine and confirm measurable value.
- Session 4** **Handover & Scaling Roadmap**
Deliver the MVP and define the path to department-wide scaling.

LEARNING OUTCOMES

- 1** **Identify AI-ready problems**
Recognise which bottlenecks are candidates for automation and how to size them.
- 2** **Build in M365**
Use Copilot and Power Automate to build working prototypes without engineering support.
- 3** **Measure & validate value**
Quantify time and cost savings in a way that satisfies finance and leadership.
- 4** **Create a scaling roadmap**
Translate a single win into a credible plan for broader enterprise adoption.

ACCELERATE is where Method activates.

One sprint. One prototype. Then the formula compounds.

READY TO MOVE FROM PILOT TO PROOF?

Start your sprint. Results in days, not months.

Book a no-obligation scoping call. We'll identify your best candidate problem and outline what your MVP could look like — before you commit to anything.
